PROFESSIONAL SUMMARY

Certified Software Engineer and Frontend Developer with 6+ years of experience designing, developing, deploying, optimizing, and maintaining websites, web applications, e-commerce platforms, and CMS-driven digital products for international clients. Experienced across JavaScript, TypeScript, React, Next.js, Node.js, PHP, Python, SQL, AWS, REST APIs, Shopify, WooCommerce, WordPress, Wix, Webflow, and HubSpot CMS. Experienced in developing modern frontend interfaces and web applications, integrating APIs and third-party services, building e-commerce functionality, deploying production applications, and optimizing websites for performance, accessibility, security, and search visibility. Also experienced in AI-assisted software development and AI integration, using generative AI and LLM-based tools to accelerate development, troubleshoot and refine code, prototype interfaces, and implement AI-powered functionality within websites, web applications, content workflows, and business processes. Combines software engineering, frontend development, AI integration, e-commerce, CMS, UI/UX, and web performance expertise to build practical, responsive, scalable, and business-focused digital products.

TECHNICAL SKILLS

JavaScript (ES6+) | TypeScript | Python | PHP | SQL | HTML5 | CSS3 | React.js | Next.js | Responsive Web Development | Component-Based Development | UI Engineering | Accessibility | Cross-Browser Compatibility | Node.js | REST APIs | Webhooks | MySQL | Third-Party API Integration | Authentication | Business Logic | LLM Integration | Generative AI | AI API Integration | OpenAI API | AI-Powered Web Applications | AI-Assisted Software Development | Prompt Engineering | AI-Powered Content Workflows | AI Automation | AWS | Git | GitHub | cPanel | DNS | SSL/TLS | Web Hosting | Application Deployment | Production Support | Shopify | Shopify Theme Development | Shopify APIs | WooCommerce | Payment Integrations | ERP/Inventory Integrations | E-commerce Workflows | E-commerce Optimization | WordPress | Elementor Pro | Gutenberg | WPBakery | Wix | Wix Studio | Webflow | HubSpot CMS | Core Web Vitals | PageSpeed Optimization | Technical SEO | Google Search Console | Rank Math | Yoast SEO | Caching | Lazy Loading | Image Optimization | Code Optimization | Website Security | Figma | Adobe Photoshop | Adobe Illustrator | Canva | Wireframing | UI/UX Design | Responsive Interface Design | Zapier | Google Apps Script | Google Workspace

PROFESSIONAL EXPERIENCE

Dev Technosys, United Arab Emirates

Software Engineer | Frontend, Web Applications, AI & E-commerce

November 2024 – July 2026

- Designed, developed, deployed, and maintained websites, e-commerce platforms, web applications, and digital products for startups, SMEs, and business clients.
- Built production-ready web solutions using JavaScript, HTML5, CSS3, WordPress, Shopify, Webflow, Wix, and custom development workflows.
- Developed and customized e-commerce platforms using Shopify and WooCommerce, including storefront functionality, product experiences, checkout-related workflows, integrations, and business logic.
- Integrated REST APIs, webhooks, payment services, ERP/inventory systems, forms, third-party platforms, and external services into websites and web applications.
- Integrated AI and LLM-powered functionality into web applications and digital workflows, connecting AI services and APIs to support automated and user-facing functionality.
- Used AI-assisted development workflows for software development, debugging, code generation, code refinement, documentation, prototyping, and implementation of web features.
- Translated UI/UX designs and product requirements into responsive, reusable, production-ready interfaces

across desktop, tablet, and mobile.

- Developed reusable frontend components and customized CMS functionality to support different client requirements and business processes.
- Performed frontend and website performance optimization involving code refinement, image optimization, caching, lazy loading, asset optimization, and Core Web Vitals improvements.
- Achieved page-speed improvements of up to 40% on optimized projects through technical analysis and implementation.
- Implemented website security, SSL, DNS, hosting, configuration, access, and production maintenance requirements.
- Diagnosed and resolved frontend, CMS, integration, hosting, deployment, and production issues across live client environments.
- Managed live websites and digital platforms, implementing feature updates, technical fixes, content changes, integrations, optimization, and ongoing maintenance.
- Used Git/GitHub and AWS/cloud environments within development, deployment, and production workflows.
- Collaborated with designers, project managers, content teams, and clients throughout the development lifecycle.
- Delivered projects in fast-paced environments with tight deadlines, achieving consistent on-time delivery and high client satisfaction rates

Dotlogics, United Arab Emirates

Frontend & E-commerce Developer

March 2023 – September 2024

- Designed and developed responsive websites, e-commerce platforms, landing pages, and web applications for international clients.
- Built frontend interfaces using JavaScript, HTML, CSS, and modern component-based development practices.
- Developed and customized solutions across WordPress, Shopify, WooCommerce, and custom web technologies.
- Converted UI/UX designs, wireframes, and business requirements into functional, responsive interfaces.
- Developed e-commerce storefronts, product pages, customer journeys, forms, landing pages, and conversion-focused user experiences.
- Integrated REST APIs, third-party services, payment systems, webhooks, and external business tools to extend application and e-commerce functionality.
- Implemented AI-assisted development workflows to accelerate implementation, debugging, prototyping, code refinement, and content-related development tasks.
- Worked with AI-powered tools and APIs to incorporate intelligent functionality into selected web experiences and business workflows.
- Managed existing client websites and digital platforms, resolving technical issues and implementing new features, integrations, and content updates.
- Conducted technical audits and implemented page-speed, frontend, asset, image, caching, and code optimizations.
- Supported technical SEO, accessibility, responsive behavior, and cross-browser compatibility.
- Collaborated with designers, developers, project managers, and clients from requirements through deployment and maintenance.

DD.NYC, United States

Web Designer & Developer

August 2021 – February 2023

- Designed and developed responsive websites and web/software applications for digital products and business clients.
- Translated UI/UX concepts, wireframes, and design specifications into functional frontend interfaces.
- Developed interfaces using HTML, CSS, JavaScript, responsive design principles, and modern web development practices.
- Contributed to web application development, frontend functionality, integrations, and product implementation.
- Worked across UI/UX design, wireframing, information architecture, visual hierarchy, and responsive user

experiences.

- Used AI-assisted development workflows for prototyping, coding, debugging, research, content generation, and iterative product development.
- Developed landing pages and digital experiences focused on usability, performance, accessibility, and conversion.
- Performed frontend and website performance optimization through code refinement, asset optimization, responsive implementation, and technical improvements.
- Debugged and resolved layout, browser compatibility, responsiveness, and application issues.

Brandlucent, Canada

Web & CMS Developer

May 2020 – June 2021

- Developed and maintained business websites and digital experiences across WordPress, Shopify, Wix, Webflow, and custom HTML/CSS/JavaScript.
- Customized WordPress themes, templates, components, plugins, layouts, and functionality to meet client requirements.
- Built and customized Shopify storefronts, product experiences, layouts, and e-commerce functionality.
- Developed responsive websites across Wix, Wix Studio, and Webflow.
- Translated UI/UX concepts and wireframes into functional, responsive production websites.
- Collaborated on website architecture, user journeys, visual layouts, interface design, and content implementation.
- Implemented website performance, usability, responsiveness, accessibility, and technical SEO improvements.
- Handled website updates, Integrations, troubleshooting, content implementation, and ongoing maintenance.

EDUCATION

Federal University Oye Ekiti, Nigeria

Bachelor of Engineering (B.Eng.) in Mechatronics Engineering

January 2018 - October 2023

CERTIFICATION

Software Engineer Certification - HackerRank | 2026

Software engineering | Problem solving | SQL | REST APIs | Algorithms | Data structures | Backend development fundamentals

Frontend Developer (React) - HackerRank | 2026

React.js | JavaScript | JSX | Components | State management | Event handling | Frontend development

Python Essentials - Cisco Networking Academy | Credly

Python programming | Variables & data types | Control flow | Functions | Exception handling | Data structures | Object-oriented programming fundamentals

React Developer - TestDome

React.js | JavaScript | Component-based development | UI development | Frontend programming

Responsive Web Design - freeCodeCamp

HTML5 | CSS3 | Responsive design | Flexbox | CSS Grid | Accessibility | Web development fundamentals

Front End Web Development - freeCodeCamp

HTML5 | CSS3 | JavaScript | Responsive web development | DOM manipulation | Web accessibility | Frontend development
